2Q 2016 Domestic Well List for EPA 4-26-16.xlsx

Dave,

Please see the attached information regarding the next domestic well sampling event at Yerington, which is scheduled to begin on June 7. Please let us know if EPA plan to collect split samples during this effort.

Thanks,

-jack

Subject: 2Q 2016 Domestic Well Table for EPA

Jack,

Attached for EPA's use is the Domestic Well table for the 2Q 2016 event, during which "Quarterly" wells (up to 54) will be sampled. The event is scheduled to start at 11 AM on Tuesday, June 7th and last through the end of Wednesday, June 8th. I assume that since this is a "quarterly" event, the EPA will not be collecting split-samples this quarter. Please let me know if this assumption is correct.

Some contact information has been revised (as indicated in the table) since our last e-mail to EPA on 2/1/16. Also, a new residence (DW-213) has been added to the monitoring program, the status of DW-33 has changed from "Outstanding" to "Pending" as the new owner requested an access agreement but has yet to return it signed, and the sampling frequency of DW-209 has changed to "Semi-Annual" from "Quarterly" as they now receive bottled water based on 1Q 2016 results. Therefore, going into the 2Q 2016 sampling event, the current totals are as follows

(as of April 26, 2016):

210 wells total

181 “Yes”, we have signed access agreements (although DW-69, DW-169, DW-200, TW-6, and WDW019 no longer are sampled)

4 “Pending”, owner(s) have indicated that a signed access agreement will be sent

2 “Outstanding”, access agreement sent but not returned, we have been unable to contact by phone and/or in person

23 “No”, owner(s) not interested in program, have declined access to sample their well

I'll let you know of any revisions to this information before the 2Q 2016 event, which again will start on Tuesday, June 7th. Please let me know if you have any questions. Thanks!

Rob Lowry
